THE APPLICATION IDENTIFIED ABOVE HAS BEEN EXAMINED AND IS ALLOWED FOR ISSUANCE AS A PATENT. PROSECUTION ON THE MERITS IS CLOSED. THIS NOTICE OF ALLOWANCE IS NOT A GRANT OF PATENT RIGHTS. THIS APPLICATION IS SUBJECT TO WITHDRAWAL FROM ISSUE AT THE INITIATIVE OF THE OFFICE OR UPON PETITION BY THE APPLICANT. SEE 37 CFR 1.313 AND MPEP 1308.

THE ISSUE FEE AND PUBLICATION FEE (IF REQUIRED) MUST BE PAID WITHIN THREE MONTHS FROM THE MAILING DATE OF THIS NOTICE OR THIS APPLICATION SHALL BE REGARDED AS ABANDONED. THIS STATUTORY PERIOD CANNOT BE EXTENDED. SEE 35 U.S.C. 151. THE ISSUE FEE DUE INDICATED ABOVE DOES NOT REFLECT A CREDIT FOR ANY PREVIOUSLY PAID ISSUE FEE IN THIS APPLICATION. IF AN ISSUE FEE HAS PREVIOUSLY BEEN PAID IN THIS APPLICATION (AS SHOWN ABOVE), THE RETURN OF PART B OF THIS FORM WILL BE CONSIDERED A REQUEST TO REAPPLY THE PREVIOUSLY PAID ISSUE FEE TOWARD THE ISSUE FEE NOW DUE.

HOW TO REPLY TO THIS NOTICE:

I. Review the SMALL ENTITY status shown above.

If the SMALL ENTITY is shown as YES, verify your current SMALL ENTITY status:

A. If the status is the same, pay the TOTAL FEE(S) DUE shown above.

B. If the status above is to be removed, check box 5b on Part B - Fee(s) Transmittal and pay the PUBLICATION FEE (if required) and twice the amount of the ISSUE FEE shown above, or

If the SMALL ENTITY is shown as NO:

A. Pay TOTAL FEE(S) DUE shown above, or

B. If applicant claimed SMALL ENTITY status before, or is now claiming SMALL ENTITY status, check box 5a on Part B - Fee(s) Transmittal and pay the PUBLICATION FEE (if required) and 1/2 the ISSUE FEE shown above.

II. PART B - FEE(S) TRANSMITTAL, or its equivalent, must be completed and returned to the United States Patent and Trademark Office (USPTO) with your ISSUE FEE and PUBLICATION FEE (if required). If you are charging the fee(s) to your deposit account, section "4b" of Part B - Fee(s) Transmittal should be completed and an extra copy of the form should be submitted. If an equivalent of Part B is filed, a request to reapply a previously paid issue fee must be clearly made, and delays in processing may occur due to the difficulty in recognizing the paper as an equivalent of Part B.

III. All communications regarding this application must give the application number. Please direct all communications prior to issuance to Mail Stop ISSUE FEE unless advised to the contrary.

IMPORTANT REMINDER: Utility patents issuing on applications filed on or after Dec. 12, 1980 may require payment of maintenance fees. It is patentee's responsibility to ensure timely payment of maintenance fees when due.

REASONS FOR ALLOWANCE

1. Claims 1-20 are allowed.
2. The following is an examiner's statement of reasons for allowance:

With respect to claim 1 and in light of Applicant's arguments (See page 3 of 4 of Applicant's arguments received 24 March 2008), the prior art does not teach or fairly suggest a method including the steps of:

assigning a phase of movement to each intermediate image,
determining the phase of movement in which there was least movement of the object in the region, by determining the intermediate image having the fewest motion artifacts in the region, and

reconstructing a computer tomographic image of the region from measured values that were acquired while the object was in the phase of movement in which there was least movement of the object in said region, the reconstruction parameters differing from the reconstructions parameters used to reconstruct the intermediate images, when taken in combination with the other limitations of the claim. Claims 2-6 are allowed by virtue of their dependency.

With respect to claim 7 and in light of Applicant's arguments (See page 3 of 4 of Applicant's arguments received 24 March 2008), the prior art does not teach or fairly suggest an apparatus including a control unit for controlling a radiation source, a drive arrangement, a detector unit, a movement-sensing means and a reconstructing unit in the following steps:

assigning a phase of movement to each intermediate image,
determining determination of the phase of movement in which there was least movement of the object in the region, by determining the intermediate image having the fewest motion artifacts in the region, and

reconstructing a computer tomographic image of the region of the object from measured values that were acquired while the object was in the phase of movement in which there was least movement of the object in said region, the reconstruction parameters that are used in this case differing from the reconstruction parameters used to reconstruct the intermediate images, when taken in combination with the other limitations of the claim. Claims 9-19 are allowed by virtue of their dependency.

With respect to claim 8 and in light of Applicant's arguments (See page 3 of 4 of Applicant's arguments received 24 March 2008), the prior art does not teach or fairly suggest a computer readable medium encoded with a computer program for a control unit for controlling a radiation source, a drive arrangement, a detector unit, and a reconstructing unit of a computer tomograph for carrying out the steps of:

assigning a phase of movement to each intermediate image,
determining the phase of movement in which there was least movement of the object in the region, by determining the intermediate image having the fewest motion artifacts in the region, and
reconstructing a computer tomographic image of the region of the object from measured values that were acquired while the object was in the phase of movement in which there was

Art Unit: 2882

least movement of the object in said region, the reconstruction parameters differing from the reconstruction parameters used to reconstruct the intermediate images, when taken in combination with the other limitations of the claim. Claim 20 is allowed by virtue of its dependency.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Conclusion

3. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Rasche et al. (US 7,277,565) discloses an apparatus and method performing the steps of:

- a) reconstructing a number of low-resolution 3D images (I) from the 3D image data set (D), the low-resolution 3D images (I) being reconstructed from 3D image data of the 3D image data set (D) which has been acquired during different phases of motion of the periodic motion,
- b) determining motion information (B) of at least one sub-zone (A) of the examination zone during the different phases of motion by means of the low-resolution 3D images (I),
- c) selecting a temporal reconstruction window (T) in which the motion of the at least one sub-zone (A) is below a predetermined level,

d) reconstructing a high-resolution sub-image (K) for the at least one sub-zone (A) from 3D image data (D) lying in the temporal reconstruction window (T) selected for the sub-zone (A), and

e) forming the desired 3D image (G) from the at least one sub-image (K), the zones of the 3D image (G) which are not reconstructed as sub-images then being reconstructed from the 3D image data so as to be combined with the at least one sub-image (K) (Abstract and Figures 1-2)

Grass et al. (US 2001/0043671 A1) discloses neutralizing motions of the patient between the acquisition of the individual series of projection data sets upon combination of the 3D data sets so as to form X-ray images which are as free from artifacts as possible by determining a transformation rule (F) describing the location in space of the 3D data sets relative to one another in such a manner that voxels are selected in a 3D data set and where their location in the other 3D data set is determined by means of a suitable similarity measure, after which X-ray images (B) are formed from the 3D data sets combined by means of the transformation rule (F) (Abstract).
